

THE PORPHYRY

1958

NEW MEXICO INSTITUTE OF

MINING AND TECHNOLOGY

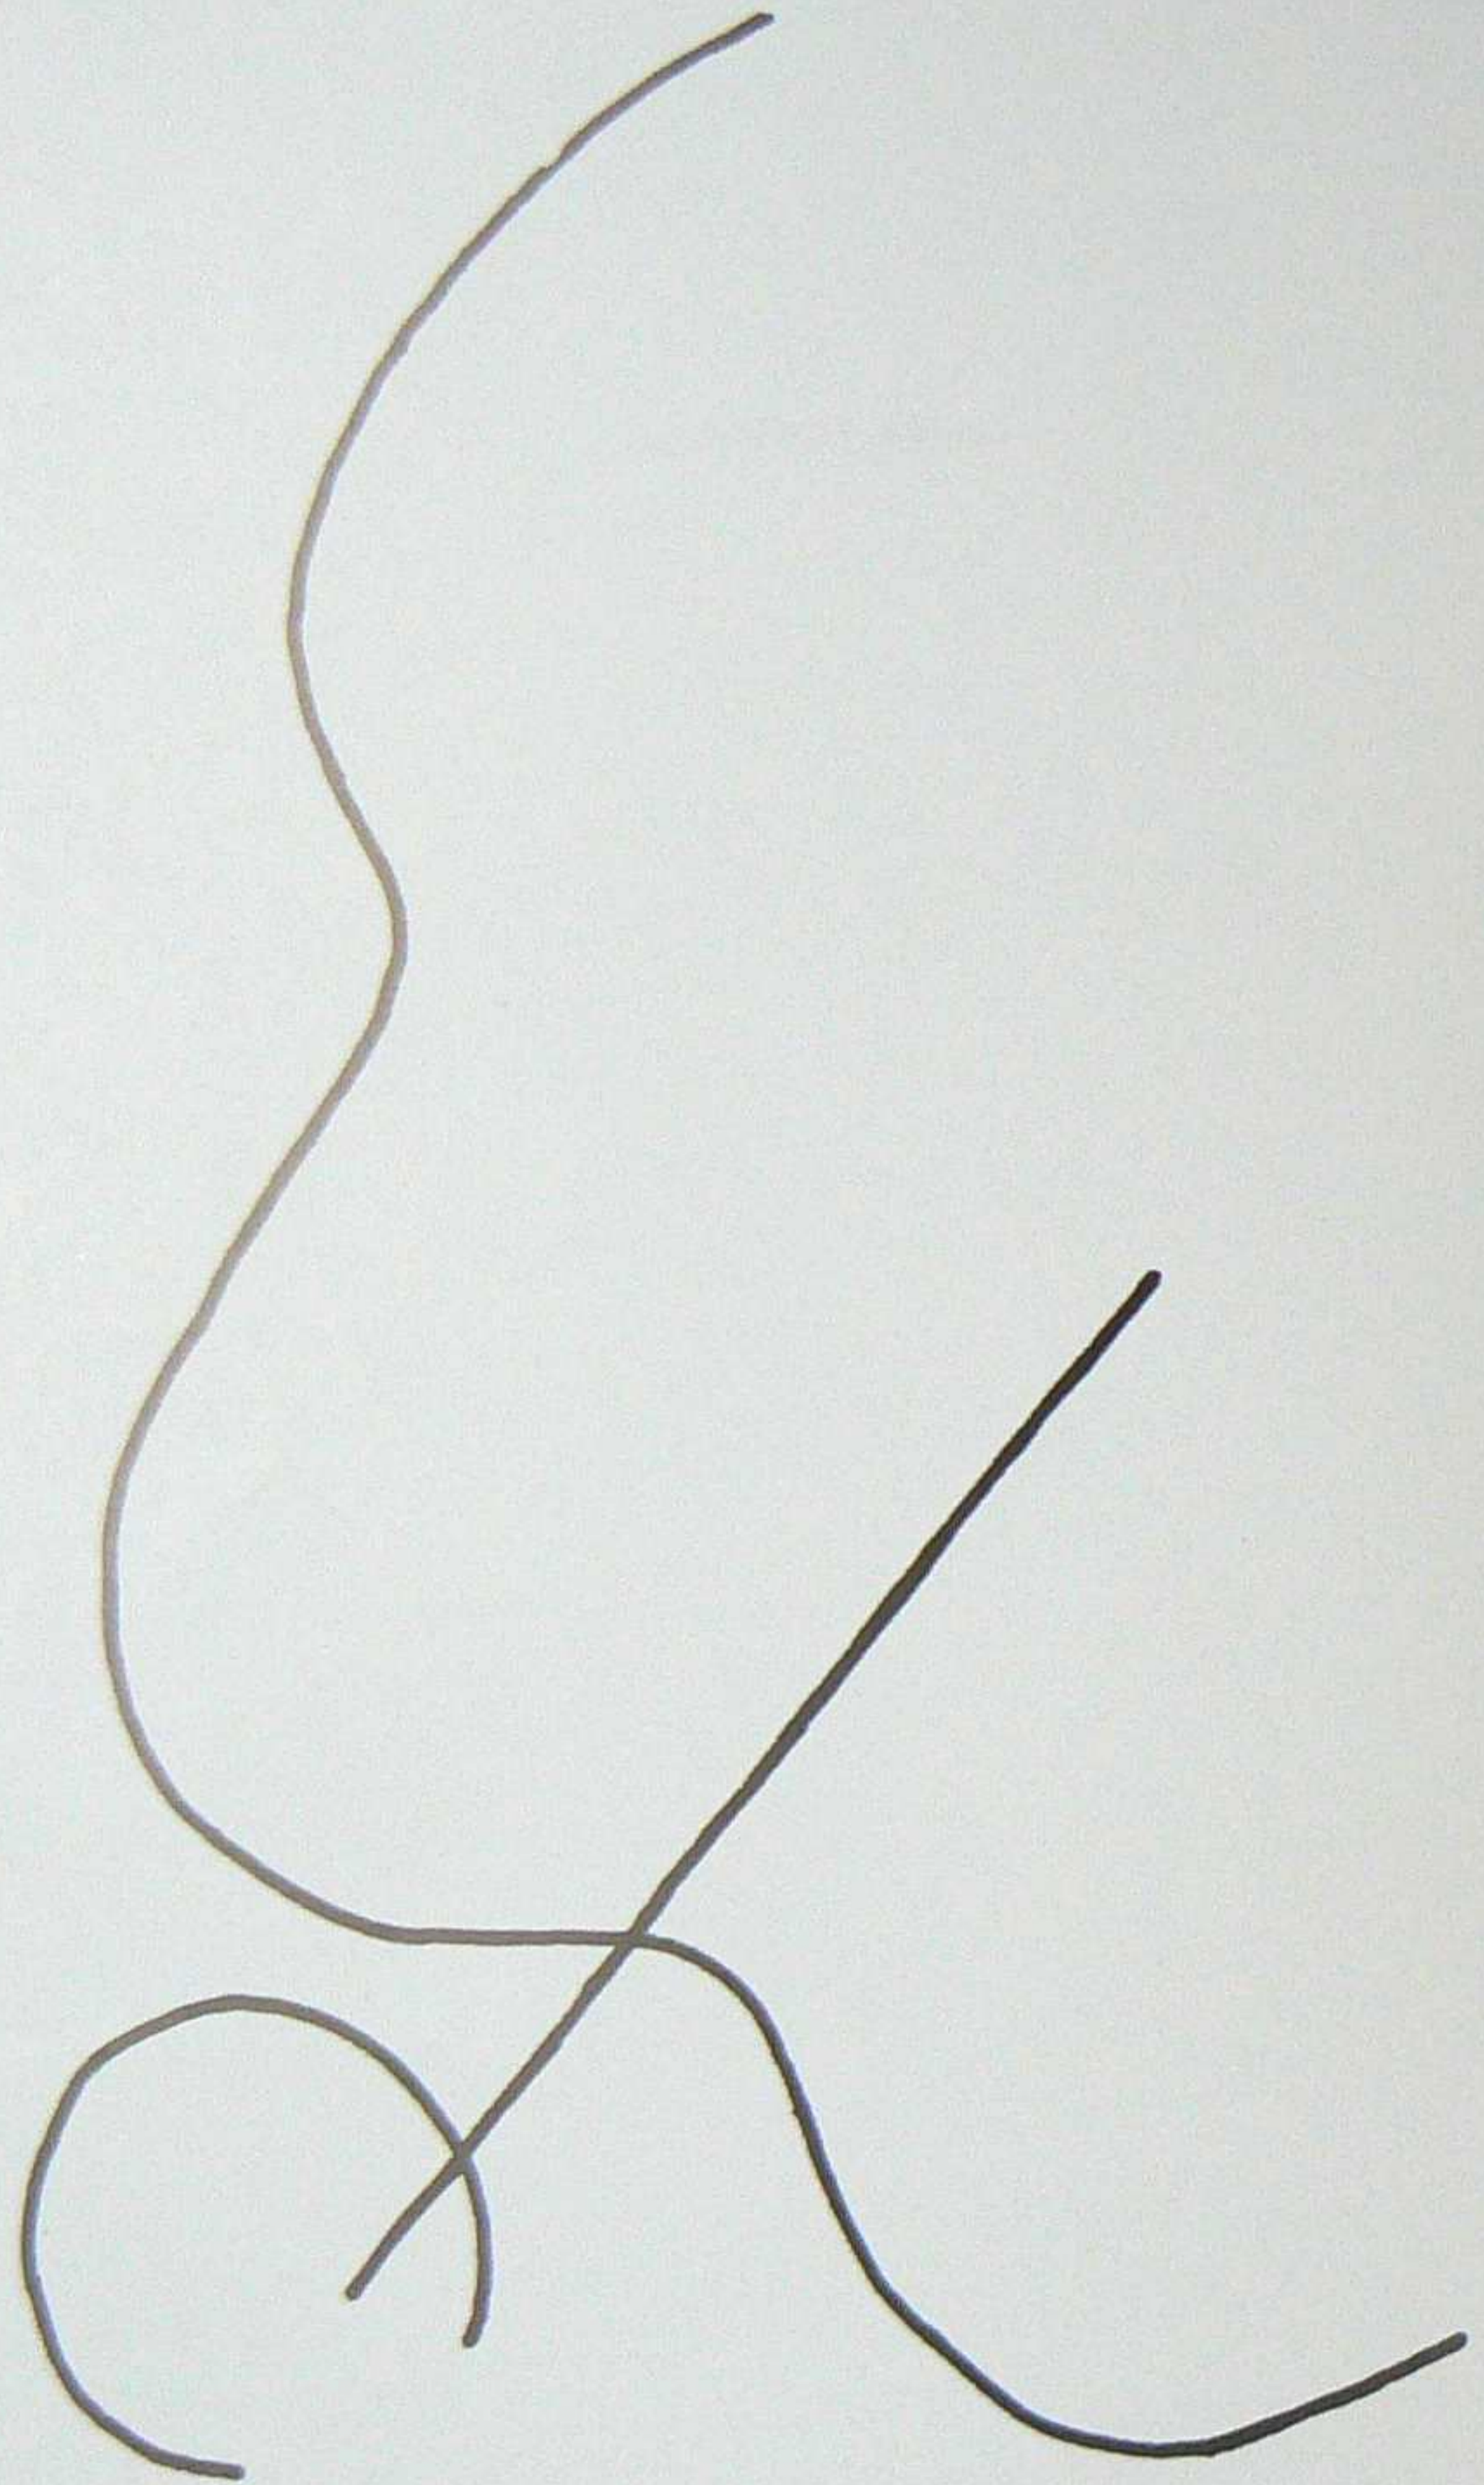

FOREWORD

Today we are living in a world of great promise. We see new ideas and accomplishments which seem incredible, but have become actualities in our changing world.

There are more ideas being contributed by young minds today than ever before. Our colleges show the effect of youthful thinking, youthful aspiration, and youthful determination to further the progress of the civilized world.

NMIMT is modern-modern in purpose and method. Its assets, combined with its potentialities for greatness along with the progressive views of youth will aid in the shaping and realization of the world of the future.

President

This hearty greeting to all NMIMT students is being written at a singularly appropriate time—during the Christmas holidays. Christmas greetings have come to me from alumni scattered all over the country, recalling most pleasantly associations and friendships of recent years. It is my sincere wish that, while you are with us as students, you will find here the kind of atmosphere which is conducive to physical, mental, and moral growth, so that in years to come each of you will look back on the time you spent at NMIMT as one of the really worthwhile periods of your life.
